

Dennis Lyons

Dennis M. Lyons, Master Sergeant (retired), joined Peduzzi Associates, Ltd. (PAL) as an Associate after being pursued by several potential prominent employers. Lyons, a United States Special Operations Command (USSOCOM) Advanced Tactical Paramedic (ATP), and service combat veteran, brings the benefits of his distinguished military service and medical expertise in Tactical Combat Casualty Care (TCCC), special operations, medical modeling, simulation and training, expeditionary force support, and emergency medicine in support of PAL's extensive client base before

Congress and the Executive Branch, to include the Department of Defense, Department of Veterans Affairs and the individual military services.

Lyons served as a Medical Laboratory Technician, Infantry Medic, Special Operations Medic, Training NCO and Medical Operations NCO during his 20 years in the U.S. Army. Most recently, he was the 68 Career Management Field Advisor and Medical Training NCO for the United States Army Special Operations Command (USASOC) providing a critical interface between the Army Medical Department (AMEDD) and USASOC. He served in the 95th Civil Affairs Brigade as the Senior Enlisted Medical Advisor and was the driving force for the rewrite of the Special Operation Civil Affairs Medical Sergeants Course and assisted in the further development of the Additional Skill Identifier W4. He served in the Joint Special Operations Command from 2002 until 2011 holding key leadership and staff positions during that period in support of various Joint Special Operations Task Forces (JSOTF). He is a widely recognized subject matter expert and consultant in the areas of combat casualty care, medical operations, CBRNE medicine, medical simulations, and training development.

MSG (Ret) Lyons has deployed in support of combat operations numerous times in support of both Operation Iraqi Freedom and Operation Enduring Freedom providing Tactical Combat Casualty Care and mission planning across the full spectrum of combat operations from the tactical to strategic level. His accomplishments as a Non-Commissioned Officer and medical professional and practitioner is a valuable resource to the PAL Team and our current and future clients.
